

In this month's Chamber Spotlight the Chamber is highlighting one of the many outstanding service businesses in the area, Breese Dental Care. Breese Dental Care is a great example of the skill and professionalism it takes to build a professional service practice. As a community we are fortunate to have such highly skilled MDs, Dentists, Optometrists and Chiropractors that choose to practice in our community.

According to the Center for Disease Control the life expectancy for males and females born in 1900 was 46.3 and 48.3, respectively. For males and females born in 2005 the life expectancy was 75.2 and 80.4, respectively. Our ability to lead longer and more active lives is due to the medical community's commitment for continuing improvement in their fields of practice.

Our local physicians also deserve credit for helping our local community lead longer and fuller lives. Our doctors invest heavily in their education and to make sure that they are on the cutting edge of their practices with access to the latest research and technology. Please join the Chamber of Commerce in its goal of ensuring our community continues to have outstanding doctors by utilizing their skills to improve your health and quality of life.

Any business interested in joining the Chamber is cordially invited to attend the next Breese Chamber of Commerce meeting on Tuesday April 28, 2009 at 6:00pm, please check the Breese Chamber of Commerce website at www.breesechamber.org for further details.
